

## Introducing the WORLD'S FIRST AIR CLEANER APP!

Available on iTunes in the App Store NOW!

The new REVEN® App: **REVEN® Air Cleaner** is available for Download in the Apple® App Store!

· this icon.

For the installation and to run the application follow the simple guidelines on the next page.

**REVEN® Air Cleaner App is now available @ the Apple® iTunes® App Store!  
The worldwide first Air Cleaner App for the Apple® iPhone and Apple® iPad.....**

**Installation and user guideline:**

1. Search for the name of the new App "**REVEN Air Cleaner**" in the iTunes® App Store and then install the App for your iPad® or iPhone®.
2. After the installation is complete, make sure you have an open WiFi connection. The next step involves a one-time large data download. It is therefore recommended to perform this download using a wireless LAN (WiFi) connection rather than consuming most or all of your data-plan quota.
3. In the Options menu you will see a Button "Download all PDF data...". Press/touch this button to download all the pdf data to your iPad® or iPhone®. After you have downloaded all pdf data, no further Wireless LAN connection will be needed to run the App. <sup>1</sup>

<sup>1</sup> Please note if your Wireless LAN connection has a weak signal strength or is interrupted, then the download might stop before it has finished. In such an event simply touch the "Download all PDF data" button again and the download will proceed from where it had stopped before!
